

WED PROPOSAL #2

Overview

Name of organisation

Deloitte

Brief history of Deloitte

"Our story begins with our purpose: making an impact that matters. Something that our founder, William Welch Deloitte, understood well. In 1845, he had a vision to build something that would last—to bring change to the accounting industry and beyond."

Mission and vision statement

Mission Statement

Deloitte's mission highlights its commitment to excellence in service delivery. It states: "Our mission is to help our clients and our people excel. "We are one of the world's leading business advisory organizations." This highlights Deloitte's pledge to deliver perfect guidance to its clients and ensuring ethical accounting principles.

Vision Statement

Vision Statement

Deloitte's vision is articulated as: "to be the Standard of Excellence." This vision calls to attention the company's aspiration to maintain its leadership position in the professional services industry by consistently delivering exceptional value and fostering a culture of innovation and collaboration.

Target Audience

Adults, Investors, Big companies

Website Goals and objectives

A website audit evaluates a site to find and fix technical errors, improve performance and user experience, enhance SEO, and increase traffic and conversions, making the website more effective overall.

Features and functionality

Performance Analysis – checks website speed and loading time

SEO Audit Tools – analyses keywords, meta tags, and rankings

Error Detection – finds broken links, missing pages, and bugs

Mobile Compatibility Check – ensures the site works on all devices

Security Scan – detects vulnerabilities and risks

Content Analysis – reviews quality, duplication, and relevance

User Experience (UX) Review – evaluates navigation and design

Analytics & Reporting Dashboard – shows traffic, issues, and improvements

Automated Reports – generates easy-to-read audit summaries

Design and user experience

- Clean and Simple Layout – easy-to-understand interface with minimal clutter
- Easy Navigation – clear menus and quick access to tools and reports
- Responsive Design – works smoothly on mobile, tablet, and desktop
- Fast Loading Interface – quick access to results and tools
- Visual Reports – charts, graphs, and color indicators for easy understanding
- User-Friendly Dashboard – central place to view audit results and insights
- Clear Call-to-Actions (CTAs) – buttons like “Start Audit” or “View Report”
- Readable Typography – clear fonts and good spacing for readability

- Interactive Elements – clickable insights, tooltips, and suggestions
- Consistent Design Style – uniform colors, icons, and layout throughout

Technical requirements

Domain requirements

e.g delottie.com

- Making it .com makes the website trustable
- Ensure it has Domain name protection

Hosting Type

Google Cloud Platform

Or

Microsoft Azure

These hosting types are secure and can secure traffic

Hosting features

- Firewall Protection
- Daily backups
- Server location compliance
- Data encryption

Programming languages

- JavaScript
- CSS3
- HTML5

Backend

Python (Financial processing and for analysis)

JavaScript

Java

C#

Database

MySQL

Security and Protection

Two factor authorization

SSL

Encryption

FSCA Regulations

POIPA (data protection)

Additional Tools

Analytics: Google Analytics

CRM: Salesforce

Email marketing: Mailchimp

Timeline and Milestones

Week 1

- Define goals (lead generation, investor information)
- Identify target audience (institutional investors, the public, hedge funds)
- List pages (Home, Services, Investment options, Contact)
- Compliance requirements (POPIA, financial disclosures)

Week 2-4

- Create a sitemap
- Create wireframes
- Create branded designs (colours, typography, trust signals)
- Design desktop + mobile layouts
- UX review for clarity and conversion

Week 5-7

- Convert designs into code (responsive layouts)
- Implement navigation, forms, and interactions
- Optimize performance (loading speed, accessibility)
- Build APIs and database structure

Week 8-9

- Ensure financial compliance messaging is visible
- SEO basics (meta tags, keywords)
- Cross-browser & mobile testing
- Security testing (SSL, data protection)
- Fix bugs and usability issues

Week 9

- Deploy to hosting server
- Connect domain
- Final checks (functions, analytics, performance)

Post – launch

- Monitor performance
- Update content (market insights, blogs)
- Security updates & backups

Budget
