

WED Website Proposal

OVERVIEW

Name of organisation

NovaNet Capital

Brief History

The company specialises on key analysis and forecasts upon financial markets which involve commodities, stocks and crypto. They provide accurate predictions and use strict risk management calculations which prevents losses for their clients. NovaNet is not a bank, it is a financial institution that provides guidance and protection for your investment choices.

Mission and vision statements

NoveNet Capital aims to be the leading investment company in the world. The company wants to build huge networks with commercial banks for people to understand the importance of investing and its benefits. Understanding how, where, and when to invest is an important of avoiding the risk of being deprived of your assets, NovNet plays the part of making the best investment decisions for you.

Target Audience

The public, Investors, Hedge Funds, Shareholders, Companies, Small business, Banks.

Website Goals and objectives

The goal and objectives of this website is to provide recognition for investment opportunities, to build transparency and accountability with its clients. The website will provide financial information for clients and non-clients. Attract potential clients and

make it easier for customers to access the brand, and most importantly strengthen the company's reputation and visibility in the financial sector.

The present key performance indicators

Indicators that will track the website's performance: Client sign-ups, Bounce rate (The percentage of how many visitors leave the website after viewing one page), Website traffic, Page views and Social Media interaction.

These indicators will measure the success performance of the website. These points serve a purpose to track the strengths and weaknesses of the website.

Products Page

The service page will cover the process and what the benefits received from investing.

Sub Pages Included:

- Quotes and contract agreements
- Investment Advice
- Client Feedback

- Estimation for Profits
- Financial News, Live market charts

Design and user experience

The Aesthetic, design and branding

- The aesthetic will be Corporate. Branding will be simple and structured to highlight professionalism. To present an established tone.

Colour Scheme

- Gray, Black, Navy blue

Typography

Monospaced. Courier

Layout and design

- The layout of the website will be based on the colour scheme. The pages will be grey, the text will be black, symbols and buttons will be highlighted in navy blue.
- The background will have strong headlines, buttons for subpages and it will abstract financial visuals such as bulls and bears
- Each page will have its functions built in functions and CTAs will stand out. (call to action)
- Avoiding cluttering the website with unnecessary information and keeping a clean and simple look.

User experience considerations

The website must be able to build trust with clients:

- Clear company information, Real contact details and previous client feedback to build clarity for potential clients
- Simple and clear navigation between the homepage and subpages. We should keep the menu items simple to not confuse the user.
- Pages and images should be optimized to serve fast and reliable online service. Avoid using too many images
- Text must be visible without zooming and fonts must be simple
- Present security information to make user feel safe while browsing the website. "Your information is protected". Display trust badges and certifications. A clear privacy policy
- The website must have clear contrast. The background must not outshine the text, and it should provide text translation for international clients.
- The website must use simple English for clients to understand information. Simple buttons to ensure functionality
